

Residential 3d 360 Virtual Tour

Bo Visuals takes pride in offering a special 360 virtual tour. 360 is a compilation of numerous 3D rendering that allow the viewer to visualize a room with all its details in 360 degrees.

Bo Visuals stands out from the competition by producing high quality 3D renderings. The work consists of 3D modeling from client's drawings, texturing, mapping and lighting. Using high performing software 3DS MAX, Bo Visuals architects and graphic designers work in a very sophisticated and detailed fashion in order to produce client expectations.

Bo Visuals offers real estate professionals advanced visualization technology to enhance marketing for new developments, and major renovation projects.

Bo Visuals LLC is a digital visualization company, specializing in 3D architectural renderings, virtual tours (360), and video animation. In 2012, Bo Visuals established its offices in the US after gaining a respectable reputation among notorious real estate developers around the world.

Bo Visuals offers real estate professionals advanced visualization technology to enhance marketing for new developments, and major renovation projects. Subject professionals may include real estate developers, building managers, realestate marketing agencies, brokers, interior designers, architects, and contractors.

3D (Photorealistic) Rendering

Bo Visuals stands out from the competition by producing high quality 3D renderings. The work consists of 3D modeling from client's drawings, texturing, mapping and lighting. Using high performing software 3DS MAX, Bo Visuals architects and graphic designers work in a very sophisticated and detailed fashion in order to produce client expectations.

From ceiling, to floor and lighting work, the Bo Visuals team has successfully faced complex, detailed and creative projects. 3D Renderings can be used for, but not limited to, printing on paper for advertising purposes, billboards and websites. They may be rendered up to a resolution of 8000 pixels.

Bo Visuals' work history includes single-family houses, multiple villa complexes, condominium buildings, hotels, and office buildings. Through a dedicated team of highly competent architects, graphic designers, as well as a high tech facility, Bo Visuals takes pride in producing top quality results for sophisticated and creative projects.

Architects / Interior Designers

Enhance your design and creative presentations by visualizing your design intent with conceptual static renderings or photo realistic 3d virtual tours!

BO Visuals can act as a third party vendor with your client or as a subcontractor of your architecture and design firm.

Working with BO Visuals you can count on an extensive library of finishes and specifications, or you can dictate your own!

Brokers

Market your client's project in pre construction with our innovative 3d virtual tours and renderings.

We're New York Based

We have been serving the New York real estate community on a variety of projects ranging from renovations of existing multi-family buildings to complete new ground up developments for both residential and hotel use in the Manhattan, Brooklyn, and Queens areas.

Not only we understand the needs of the NY real estate market but also we understand the importance of local service for our clients. Our business development team is deeply involved both with the architect, contractors and all the other third parties involved in the real estate project.
